Subject: Treatment Plan for Lark Town Site, Kennecott Utah Copper; Bingham Canyon Mine; M/035/0002; Salt Lake County, Utah

Dear Mr. Kaiser:

Before allowing continued mining activity in the area of the Lark Town site, the Division of Oil, Gas and Mining (Division) needs to approve a treatment plan for this area. On August 8, 2014, the Division received a report concerning the cultural resources in the East Waste Rock Expansion area. This report indicated there were no significant cultural resources in the area, and the Division asked the State Historic Preservation Officer (SHPO) for concurrence with its finding that no significant resources would be adversely affected by the proposal.

The SHPO did not concur with the Division's eligibility determination for the Town of Lark. Before this area is affected by mining operations, the Division and SHPO need to approve a treatment plan. The Division suggests that this plan be developed by your archaeological consultant in cooperation with the SHPO.

Please contact me at 801-538-5261 or Leslie Heppler at 801-538-5257 if you have questions about this requirement. Thank you for your cooperation.

Sincerely,

Paul B. Baker  
Minerals Program Manager
